# POWERSPORT RECREATIONAL BELT APPLICATIONS

# DON'T BREAK IT. BREAK IT IN.

BRING A NEW BELT TO LIFE IN THREE STEPS SO  
YOU CAN SHRED THE TERRAIN, NOT YOUR BELT.

For best performance and longest life, follow these three steps when installing a new belt.

**1** INSTALL THE RIGHT BELT

Using a belt that's even slightly different than the OE specs can affect performance — or stop you in your tracks.

**2** ALIGN + CLEAN

Align the clutches according to manufacturer's specs and clean the sheaves with a Scotch-Brite® pad. Remove old belt residue, glazing, oils and debris with alcohol or acetone. **DO NOT USE BRAKE CLEANER.**

**3** INSTALL + BREAK IT IN

Perform two heat cycles (10-15 minutes each) at 80°F at 30-40 mph (2-wheel drive) with cover installed. Bring the belt temperature down to normal operating temperatures, then shut down and let cool for 30 minutes. Repeat the process a second time. If belt installation is at a temperature of 60°F or below, perform two heat cycles in 20 minutes at 30-40 mph (2-wheel drive) with cover installed. Bring the belt temperature down to normal operating temperatures, then shut down and let cool for 30 minutes. Repeat the process a second time.

**Caution**

Use Gates products only on applications specified in Gates product literature. Install and maintain products according to the vehicle manufacturer's recommended procedures and with recommended tools. Failure to follow these instructions could result in injury or property damage. Gates Corporation disclaims all liability due to failure to follow these instructions.

**WARNING!**

Do not use Gates belts, pulleys or sprockets on any aircraft propeller or rotor drive systems or in-flight accessory drives. Gates products are not designed or intended for aircraft use.

## WARRANTY

### Limited Warranty for the Life of the Merchandise

Goods are warranted to be free from defects in material or workmanship for the life of the Goods (or the published recommended replacement interval specified by Gates). Gates will replace or repair, at its option, any Goods proved defective in material or workmanship during the warranty period. This is the sole remedy for breach of warranty. Color fade and color difference is not warranted. This warranty is void if the defect is caused by improper installation, use or maintenance of the Goods, or used for racing or competition. Goods are not warranted to comply with laws that may apply to use of the Goods not stated in related materials, e.g., use in manned or unmanned aviation or life support applications.

ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE EXPRESSLY DISCLAIMED. FAILURE TO REPLACE TIMING BELTS OR OTHER GATES PRODUCTS AS SPECIFIED MAY RESULT IN CATASTROPHIC ENGINE OR EQUIPMENT DAMAGE. FOR WHICH GATES DISCLAIMS ALL RESPONSIBILITY, TO THE EXTENT PERMITTED BY APPLICABLE LAW.

### Mise En Garde:

Les produits Gates doivent être utilisés seulement pour les applications indiquées dans les documents et textes de Gates. L'installation et l'entretien des produits doivent être faits dans le respect des directives du constructeur du véhicule et à l'aide des outils recommandés par ce dernier. Le non-respect de ces directives pourrait occasionner des blessures ou des dommages matériels. Gates décline toute responsabilité à l'égard d'un problème dû au non-respect de ces directives.

### AVERTISSEMENT!

Les courroies, poulies et roues dentées Gates ne doivent pas être installées sur les hélices, les systèmes d'entraînement de rotor ou les systèmes d'entraînement d'accessoires embarqués des avions. Les produits Gates ne sont pas conçus pour un usage dans des avions.

### Garantie limitée valable pour la durée de vie utile du produit

Les produits sont garantis contre tout défaut de matériau et de fabrication pour la durée de vie utile du produit (ou pour l'intervalle de remplacement recommandé indiqué dans les documents de Gates). Gates remplacera ou réparera, à sa seule discrétion, tout produit présentant un défaut avéré de matériau ou de fabrication au cours de la période de validité de la garantie. Ceci constitue le seul et unique recours aux termes de la présente garantie. La décoloration et la différence de couleur ne sont pas garanties. La garantie est annulée si la défektivité est causée par une installation incorrecte, un usage inadéquat ou un travail d'entretien ou de réparation inadéquat, ou si le produit est utilisé à des fins de course ou de compétition. Les produits ne sont pas certifiés conformes aux règlements qui peuvent s'appliquer pour des usages dans un domaine non connexe, c.-à-d. usage pour l'aviation avec ou sans équipage ou dans de l'équipement de survie.

TOUTE AUTRE GARANTIE EXPRESSE OU IMPLICITE, Y COMPRIS NOTAMMENT TOUTE GARANTIE DE QUALITÉ MARCHANDE OU D'ADAPTABILITÉ À UN USAGE PARTICULIER, EST EXPRESSÉMENT EXCLUE EN VERTU DES PRÉSENTES. LE NON-RESPECT DES DIRECTIVES DE REMPLACEMENT DES COURROIES DE DISTRIBUTION OU DES AUTRES PRODUITS DE GATES PEUT OCCASIONNER DES DOMMAGES MAJEURS AU MOTEUR OU À L'ÉQUIPEMENT, POUR LESQUELS, DANS LES LIMITES PERMISES PAR LA LOI, GATES DÉCLINE TOUTE RESPONSABILITÉ.

### G-FORCE® LIMITED WARRANTY

The Gates G-Force® belts are warranted to the original purchase from defects in materials and workmanship for one year for snowmobile belts and two year for ATV/UTV belts from the date of purchase under normal use. This warranty shall be automatically null and void if the belt is used under abnormal conditions including but not exclusive to racing or any competitive event, case of improper installation, alignment, application clutch case sealing, towing or poor clutch condition. Final authorization on warranted product to be by Gates Corporation.

### GARANTIE LIMITÉE G-FORCE<sup>MD</sup>

Les courroies G-Force<sup>MD</sup> de Gates offrent une garantie à partir de la date d'achat, à l'acheteur d'origine, et en fonction d'une condition d'utilisation normale, d'une année sur les courroies motoneiges et de deux années sur les courroies VTT/ VUTT, contre les défauts de matériaux et de fabrication. Cette garantie sera automatiquement annulée si la courroie est utilisée dans des conditions anormales incluant sans être exclusif à la course ou à tout événement de compétition, cas d'installation inadéquate, alignement, application, scellage du boîtier d'embrayage, remorqueage ou à une mauvaise condition de l'embrayage. L'approbation finale sur les produits garantis sera faite par Gates Corporation.

## FEATURED PRODUCTS PRODUITS PRÉSENTÉS

### GATES IS PUSHING THE LIMITS OF POWERSPORTS PERFORMANCE.

Gates is pushing the limits of what's possible to redefine the recreational ride experience. When you go off-road, your vehicle can't go offline. The next generation of continuously variable transmission (CVT) belts are higher performing and more durable than ever before. Utilizing proprietary design software combined with the most advanced composite materials and construction technology, Gates powersports products are engineered to meet the demands of today's and tomorrow's high-performance ATV, UTV and snowmobile platforms.

### GATES REPOUSSE LES LIMITES DU RENDEMENT POUR LES SPORTS MOTORISÉS.

Gates repousse les limites du possible pour redonner une nouvelle dimension à la conduite des véhicules de loisirs. Lorsque vous faites du tout-terrain, il est hors de question que votre véhicule vous lâche. La prochaine génération des courroies (CVT) de transmission à variation continue a un rendement plus élevé et est plus robuste que jamais. Faisant appel à la fois à un logiciel de conception exclusif et aux matériaux composites et technologies de fabrication les plus avancés sur le marché, les produits pour sports motorisés de Gates sont mis au point pour satisfaire les demandes d'aujourd'hui et de demain des plateformes de VTT, VUTT et motoneiges à hautes performances.

**OFF-ROAD INNOVATION FOR POWERSPORTS EQUIPMENT:**

**G-FORCE® C<sub>12</sub>® CVT BELT**

**THE INDUSTRY'S FIRST TRUE CARBON TENSILE BELT.**

**ELEVATE YOUR OFF-ROAD EXPERIENCE WITH GATES CARBON BELT TECHNOLOGY.**

Meet the industry's first true carbon tensile belt — Gates G-Force® C<sub>12</sub>® Continuously Variable Transmission (CVT) belts are engineered for drop-in\* performance, featuring exceptional strength, flexibility and durability for ATVs, UTVs, side-by-sides, and snowmobiles.

Gates G-Force belt portfolio utilizes proprietary design software, advanced materials and process technology to meet the demands of your recreational powersports equipment.

\* **Clutch deflection may need adjustment as necessary.**

**FEATURES + BENEFITS**

Advanced materials and technology enable:

- Advanced carbon cord results in minimal stretch with extraordinary strength for faster acceleration.
- Trapezoidal top cog with rounded bottom cog provides excellent flexibility and efficiency.
- Aramid fiber loaded elastomer compound for durability and optimized performance.
- Gains optimal power transmission for fast acceleration, improved throttle response and consistent shifting performance.
- Maintains peak power throughout the shift curve.

**INNOVATION TOUT-TERRAIN POUR LE MATÉRIEL DE SPORTS MOTORISÉS :**

**COURROIE CVT G-FORCE<sup>MD</sup> C<sub>12</sub><sup>MD</sup>**

**LA PREMIÈRE COURROIE DE L'INDUSTRIE VÉRITABLEMENT DOTÉE D'UNE CORDE DE TRACTION EN CARBONE**

**GRÂCE À LA TECHNOLOGIE DES COURROIES À CORDE EN CARBONE DE GATES, DONNEZ UNE NOUVELLE DIMENSION À VOTRE CONDUITE TOUT-TERRAIN.**

Faites connaissance avec la première courroie de l'industrie véritablement dotée d'une corde de traction en carbone : Les courroies (CVT) pour transmission à variation continue Gates G-Force<sup>MD</sup> C<sub>12</sub><sup>MD</sup> sont mises au point pour se poser sans modification de l'installation\* et présentent une solidité, une flexibilité et une robustesse exceptionnelles pour les VTT, les VUTT, les autoquads biplaces, et les motoneiges.

Le portefeuille de courroies Gates G-Force fait appel à un logiciel de conception exclusif et aux matériaux composites et technologies de fabrication les plus avancés sur le marché pour satisfaire les demandes de votre matériel de sports motorisés de loisir.

\* **Le cas échéant, la déflexion du disque d'embrayage peut nécessiter un réglage.**

**CARACTÉRISTIQUES ET AVANTAGES**

Les matériaux et la technologie de pointe permettent :

- La corde en carbone est d'avant-garde et offre un étirement minimal avec une solidité extraordinaire lors de fortes accélérations.
- La dent supérieure trapézoïdale et la dent inférieure arrondie fournissent une flexibilité et une efficacité supérieures.
- La composition d'élastomère renforcée de fibre aramide offre une robustesse supérieure et un rendement optimisé.
- Transmission optimale de la puissance lors de fortes accélérations, réponse améliorée de la pédale d'accélérateur et rendement constant lors d'un changement de vitesse.
- Maintien de la puissance de pointe tout au long de la courbe de changement de vitesse.

## POWER THROUGH THE TOUGHEST OFF-ROAD TRAILS

For over a century, Gates has driven innovation in belt technology to power the machines that move you. Gates G-Force® C<sub>12</sub>® CVT belt drives are engineered to navigate the toughest off-road trails with power and efficiency. The industry's first CVT belt with carbon tensile cord also features a trapezoid top-notch and rounded cog design for superior flexibility and heat dissipation, along with a unique gum adhesion that reduces fiber pullout within the belt extending the life of the belt. Gates combines material science and process engineering to create innovative products that provide performance, reliability and the strength to withstand even the most challenging off-road environments. Continuous innovation isn't just what we do. It's who we are.

### WHY G-FORCE C<sub>12</sub>?

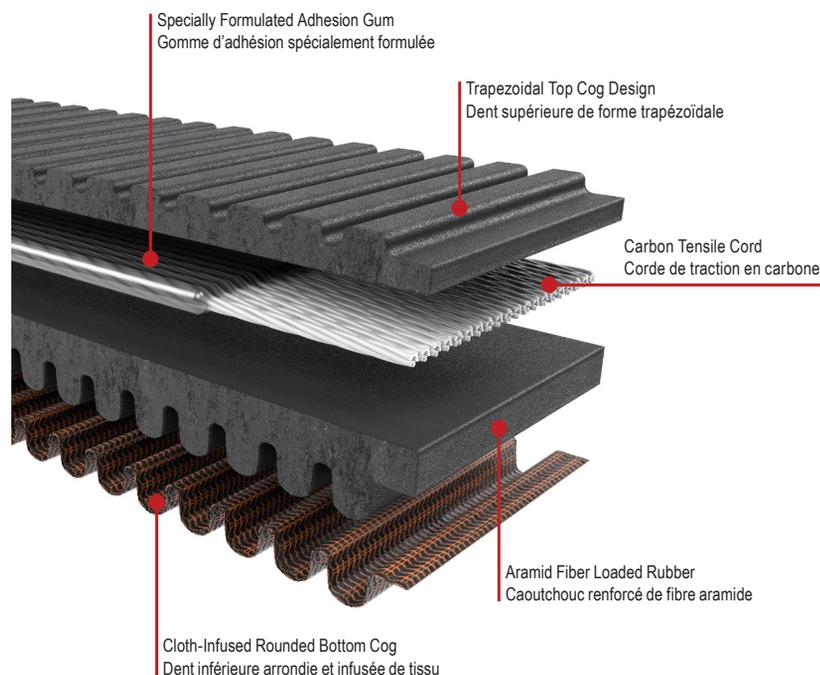

- **STRENGTH:** The first CVT belt utilizing carbon tensile cord for minimal stretch and extraordinary strength.
- **FLEXIBILITY:** High-performance neoprene with a trapezoidal top-notch and rounded bottom cog design maximizing heat control and flexibility.
- **DURABILITY:** Carbon tensile cords are bonded to aramid fiber-loaded rubber with specially formulated adhesion gum, resulting in increased side-load resistance, preventing belt distortion and edge cord pullout.
- **PERFORMANCE:** Gain optimal power transmission for faster acceleration, improved throttle response and consistent shifting performance.

## UTILISEZ TOUTE LA PUISSANCE DE VOTRE MACHINE SUR LES PISTES TOUT-TERRAIN LES PLUS ACCIDENTÉES

Depuis plus d'un siècle, Gates a conduit l'innovation technologique dans le domaine des courroies pour que vous puissiez profiter de la pleine puissance de votre véhicule. Les entraînements par courroie CVT Gates G-Force<sup>MD</sup> C<sub>12</sub><sup>MD</sup> sont mis au point pour que vous puissiez emprunter les pistes tout-terrain les plus accidentées avec puissance et efficacité. La première courroie CVT de l'industrie véritablement dotée d'une corde de traction en carbone présente également un cran supérieur trapézoïdal et des dents arrondies conçus pour obtenir une flexibilité et une dissipation de la chaleur supérieures, l'adhérence unique de la gomme permettant de réduire la rupture des fibres à l'intérieur de la courroie et de prolonger sa durée de vie. Gates a su allier la science des matériaux à l'ingénierie des procédés pour créer des produits qui fournissent le rendement, la fiabilité et la solidité nécessaire pour résister aux conditions les plus extrêmes offertes par les environnements tout-terrain. Mais l'innovation continue n'est pas notre seul cheval de bataille. Il s'agit également de ce que nous sommes.

### POURQUOI G-FORCE C<sub>12</sub>?

- **SOLIDITÉ** : la première courroie CVT utilisant une corde de traction en carbone pour un étirement minimal et une solidité extraordinaire.
- **FLEXIBILITÉ** : l'utilisation de néoprène haute performance avec un cran supérieur trapézoïdal et une dent inférieure arrondie permet de dissiper la chaleur au maximum et d'obtenir une flexibilité exceptionnelle.
- **ROBUSTESSE** : les cordes de traction en carbone sont collées à du caoutchouc à gomme d'adhésion spécialement formulé et renforcé de fibre aramide permettant d'obtenir une résistance accrue aux forces latérales, empêchant ainsi la déformation de la courroie et la rupture de la corde sur les bords.
- **RENDEMENT** : transmission optimale de la puissance lors de fortes accélérations, réponse améliorée de la pédale d'accélérateur et rendement constant lors d'un changement de vitesse.

**BELT TECHNOLOGY FOR VARIABLE SPEED DRIVES:**

**G-FORCE® CVT BELT**

**ENGINEERED FOR DURABILITY, SIMPLICITY, PERFORMANCE AND VALUE.**

**WE'RE PUTTING THE POWER IN POWERSPORTS.**

Gates G-Force® continuously variable transmission (CVT) belts are engineered to deliver performance, durability, simplicity and value ideally for low to mid-range horsepower ATVs, UTVs and snowmobiles.

Gates G-Force belt portfolio utilizes proprietary design software, advanced materials and process technology to meet the demands of your recreational powersports equipment.

Whether trail riding, farming, ranching or extreme riding — Gates G-Force belts are engineered for the most demanding off-road conditions.

**FEATURES + BENEFITS**

**Advanced materials and technology enable:**

- OEM constructed drop-in\* belt; proprietary measuring technology assures exact fit (\*Clutch deflection may need adjustment as necessary).
- Matches OE belt shift curves and pulley speed ratios; excellent performance at a reduced cost.
- Extensively lab-tested using severe-duty dynamometer conditions and on vehicles in the field.
- Advanced trapezoid top notch and rounded cog design maximize heat dissipation and flexibility.
- Advanced aramid tensile cords and reinforced fiber loaded undercord for durability and dependability.

**TECHNOLOGIE DE COURROIE POUR ENTRAÎNEMENTS À VITESSE VARIABLE :**

**COURROIE CVT G-FORCE®**

**MISE AU POINT POUR UNE ROBUSTESSE, UNE SIMPLICITÉ, UN RENDEMENT ET UN RAPPORT QUALITÉ-PRIX SUPÉRIEURS.**

**NOUS METTONS DE LA PUISSANCE DANS LES SPORTS MOTORISÉS.**

Les courroies CVT Gates G-Force<sup>MD</sup> sont mises au point pour fournir du rendement, de la robustesse, de la simplicité et un excellent rapport qualité/prix pour les VTT, VUTT et motoneiges de puissance faible à moyenne.

Le portefeuille de courroies Gates G-Force fait appel à un logiciel de conception exclusif et aux matériaux composites et technologies de fabrication les plus avancés sur le marché pour satisfaire les demandes de votre matériel de sports motorisés de loisir.

Que ce soit pour le tout-terrain, l'agriculture, l'élevage en ranch ou la conduite extrême, les courroies Gates G-Force sont mises au point pour répondre aux conditions de tout-terrain les plus éprouvantes.

**CARACTÉRISTIQUES ET AVANTAGES**

**La science des matériaux et la technologie de pointe permettent :**

- Courroie de FEO se posant sans modification de l'installation\*; la technologie exclusive de mesure assure une parfaite compatibilité (\*le cas échéant, la déflexion du disque d'embrayage peut nécessiter un réglage).
- La courroie d'origine correspond aux courbes de changement de vitesse et aux rapports de vitesse de poulie; excellent rendement à un coût réduit.
- Essais extensifs en laboratoire reproduisant au dynamomètre des conditions extrêmes de conduite de véhicule sur le terrain.
- La dent supérieure trapézoïdale et la dent inférieure arrondie font appel à une conception de pointe pour augmenter au maximum la dissipation de la chaleur et la flexibilité.
- Les cordes de traction en aramide et la sous-corde renforcée par de la fibre font appel à une technologie d'avant-garde pour offrir une robustesse et une fiabilité supérieures.

## OFF-ROAD INNOVATION FOR EPIC ADVENTURES

Gates G-Force® continuously variable transmission (CVT) belts are the ultimate, high-tech component for transferring power on your smaller recreational powersports equipment. We designed G-Force belts with durability, simplicity, performance and value in mind, then tested it under tough conditions in controlled environments. So whether you're loading up your UTV for a hard day's work or off-roading on the road less traveled, Gates recreational belt drives and power transmission solutions continue to push the limits of what's possible so you can, too.

### WHY G-FORCE® CVT BELTS?

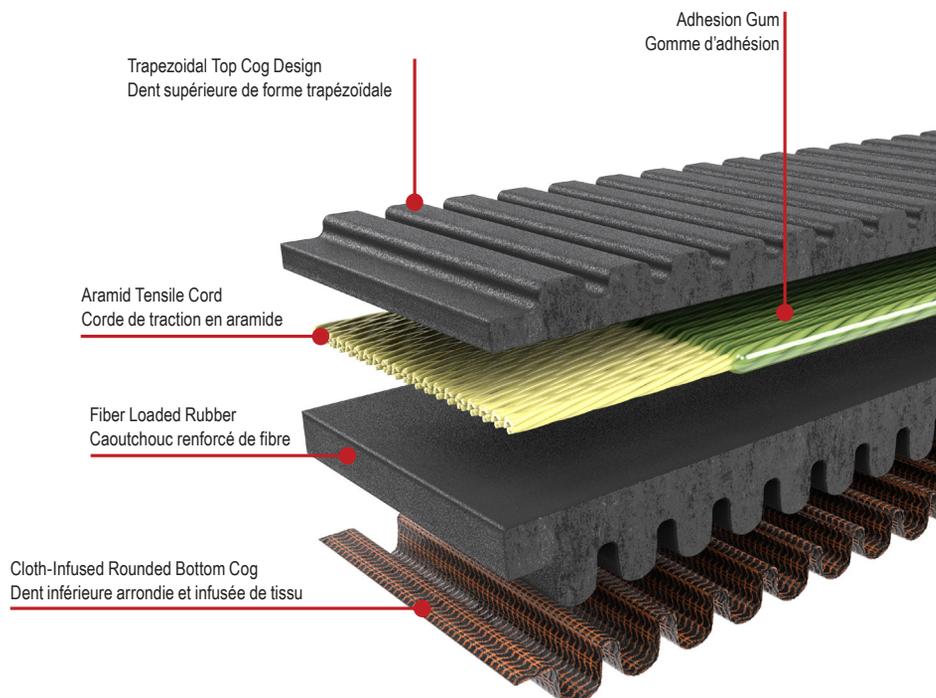

- Delivers performance, durability, simplicity and value in extreme off-road environments.
- Flexible, high-performance materials enable grab-and-go mobility and responsive acceleration.
- Extended Life — shown to outlast other aftermarket belts by up to 5X.
- Advanced Aramid tensile cords and reinforced fiber-loaded undercord for added dependability.

## INNOVATION TOUT-TERRAIN POUR DES AVENTURES ÉPIQUES

Les courroies (CVT) pour transmission à variation continue Gates G-Force<sup>MD</sup> sont ce qui se fait de mieux en matière de composants de haute technologie pour transmettre la puissance dans votre petit véhicule de sports motorisés de loisirs. Nous concevons des courroies G-Force en nous focalisant sur la robustesse, la simplicité, le rendement et le bon rapport qualité-prix, puis nous les testons dans des conditions difficiles sous environnement contrôlé. Que vous utilisiez votre VUTT pour une dure journée de travail ou que vous conduisiez sur des pistes tout-terrain peu fréquentées, les entraînements par courroie pour les loisirs et les solutions de transmission Gates ne cessent de repousser les limites du possible, pour que vous le puissiez aussi.

### POURQUOI DE COURROIES CVT G-FORCE<sup>MD</sup>?

- Offrent rendement, robustesse, simplicité et bon rapport qualité-prix dans les environnements tout-terrain extrêmes.
- Les matériaux flexibles de haute performance permettent de disposer de toute la mobilité et de toute l'accélération réactive nécessaires.
- Durée de vie prolongée : il a été prouvé que ces courroies durent cinq fois plus longtemps que d'autres courroies du marché des pièces de rechange.
- Les cordes de traction en aramide et la sous-corde renforcée par de la fibre font appel à une technologie d'avant-garde pour offrir une robustesse et une fiabilité supérieures.

## FEATURED PRODUCTS PRODUITS PRÉSENTÉS

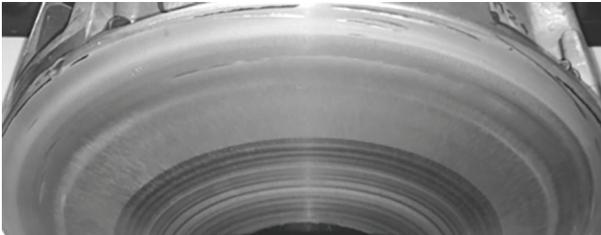

### CVT BELT INSTALLATION BREAK-IN

To ensure optimal operation of newly installed belts, the CVT sheaves must be cleaned of all old belt residue, glazing, and oils. Cleaning can be accomplished by carefully scuffing belt contaminants off the sheave/belt contact area with a mild abrasive such as 220-400 grit sandpaper, Scotch Brite® Pad, or Steel Wool. Follow up by cleaning the surfaces thoroughly with alcohol or acetone until all impurities have been removed. Cleaning the sheave surface until all contaminants have been removed is vital to future belt and CVT operation. If any particles remain, belt slip and a noticeable drop in vehicle performance can occur. If a belt is to be removed and reinstalled during future maintenance, it is highly recommended that the belt is reinstalled in the same direction as before to match belt wear profile to contact with the corresponding sheave profile.

#### New Belt Break In Process:

- New CVT drive belts require a break-in period of a minimum 30 miles to maximize belt life and performance. The goal of the break-in period is to properly wear in the belt to match the sheaves before applying maximum engine torque. By conservatively running through the entire shift range, proper belt contact over the entire sheave/belt contact path is optimized to eliminate belt slippage and drastically increase the belt's lifespan.
- Remove the clutch cover.
- Blow out the clutches and exhaust ports in the clutch box with compressed air if possible. This removes dust, dirt and debris and allows the clutch system to operate correctly. If the previous belt broke, remove all the debris and cord if any is left in the Primary or Secondary clutches. Check the clutch box exhaust ports for belt debris.
- Clean the clutch sheaves with maroon Scotch Brite® pads and wipe them clean with alcohol or acetone poured or sprayed on a rag – do not spray into the clutches. This removes the old belt residue and oils which causes the new belt to slip and glaze. It also provides the new belt a clean surface to transfer power.
- Install new belt so it can be read right side up. Do Not roll or pry in the new belt. Open the Secondary clutch as recommended by the OEM. Release tension on the Secondary. Spin belt with the engine OFF by rolling the secondary by hand. Start unit up in park and let it idle for 30 seconds. Turn off the engine and replace the clutch cover. If the belt doesn't come to rest and stop spinning in park and the idle has dropped to normal warm engine rpm, check your system for alignment. On snow machines you may need to adjust your deflection. See the owner's manual for proper alignment and Center-to-Center distances of the clutch system.
- Perform 2 Heat Cycles.
- HEAT CYCLE: At 80°F drive the unit 10-15 minutes at 30-40 mph (2-wheel drive) with cover installed. If belt installation is at a temperature of 60°F or below, drive the unit for 20 minutes. Avoid hard accelerations and hills. Flat terrain works best.
- Bring the belt temperature down to normal operating temperatures, then shut down and let cool for 30 minutes.
- Repeat the HEAT CYCLE for a second time. Let the belt cool down again for 30 minutes and you have a well broken in belt.

Dirty Sheave Plates / Poulie sale

Clean Sheave Plates / Poulie propre

Although G-Force® belts are not directionally biased, it is recommended to install them with the label lettering facing toward the user to keep belt reinstallation consistent.

Même si l'installation des courroies G-Force<sup>MD</sup> peut se faire dans une direction ou dans l'autre, il est recommandé d'installer les courroies de façon à ce que la marque soit face à l'utilisateur et de la réinstaller ultérieurement de la même façon.

## INSTALLATION ET RODAGE DE COURROIE CVT

Pour assurer le fonctionnement optimal d'une courroie qui vient d'être posée, les gorges de poulie de la CVT doivent être nettoyées pour éliminer tous les résidus de l'ancienne courroie, les dépôts et les huiles. Le nettoyage peut s'effectuer en grattant soigneusement les contaminants déposés sur la zone de contact gorge de poulie/courroie à l'aide d'un abrasif doux, par exemple du papier abrasif de 220 à 400 grains, un tampon Scotch Brite® ou de la laine d'acier. Nettoyez ensuite minutieusement les surfaces à l'alcool ou à l'acétone jusqu'à complète élimination des impuretés. Le nettoyage de la surface des gorges de poulie jusqu'à ce que tous les contaminants soient éliminés est vital pour le fonctionnement de la future courroie CVT. Si la moindre particule reste, la courroie peut glisser et sensiblement réduire les performances du véhicule. Si une courroie doit être déposée et remontée pour un entretien, il est vivement recommandé que la courroie soit posée dans le même sens qu'avant sa dépose, et ce afin de faire correspondre le profil d'usure au contact approprié du profil des gorges de poulie.

Procédure de rodage d'une courroie neuve :

- Les courroies neuves CVT nécessitent une période minimale de rodage d'au moins 50 kilomètres pour augmenter au maximum la durée de vie et le rendement de la courroie. L'objectif de la période de rodage est d'user de façon appropriée la courroie de la même façon que les gorges de poulie avant de faire tourner le moteur à son régime maximal. En passant les vitesses sans brusquer, le contact approprié de la courroie avec le chemin de contact gorge de poulie/courroie est optimisé afin d'empêcher le glissement de la courroie et de prolonger considérablement la durée de vie de la courroie.
- Retirez le couvercle d'embrayage.
- Soufflez au besoin de l'air comprimé sur les embrayages et les orifices d'échappement de la boîte d'embrayage. Ceci élimine la poussière, la saleté et les débris et permet au système d'embrayage de fonctionner de manière appropriée. Si l'ancienne courroie s'est cassée, retirez tous les débris et la corde pouvant rester dans les embrayages principal et secondaire. Inspectez les orifices d'évacuation de la boîte d'embrayage pour vérifier s'il y a des débris de courroie.
- Nettoyez les gorges de poulie de l'embrayage à l'aide d'un tampon marron Scotch Brite® et nettoyez-les à l'aide d'un chiffon sur lequel vous aurez versé ou pulvérisé de l'alcool ou de l'acétone. Ne pulvérisiez rien sur les embrayages. Ceci élimine les résidus et l'huile de l'ancienne courroie qui pourraient faire glisser la nouvelle courroie et la recouvrir d'un dépôt. Cette opération permet également de fournir à la nouvelle courroie une surface propre pour transmettre la puissance.
- Posez la courroie neuve de façon que sa face supérieure puisse être lue. Ne roulez pas la courroie neuve et n'exercez aucune force de levier dessus. Ouvrez l'embrayage secondaire en suivant les recommandations du FEO. Relâchez la tension sur l'embrayage secondaire. Moteur arrêté, faites tourner la courroie en faisant tourner l'embrayage secondaire à la main. Démarrez le véhicule en position de stationnement « Park » et faites tourner le moteur au ralenti pendant 30 secondes. Coupez le moteur et remplacez le couvercle d'embrayage. Si la courroie ne s'arrête pas de tourner en position de stationnement et si le ralenti est normal pour un moteur chaud, vérifiez l'alignement de votre système. Sur les motoneiges, il se peut que vous deviez régler la déflexion. Pour l'alignement approprié et les distances de centre à centre du système d'embrayage, consultez le manuel d'utilisation.
- Effectuez deux cycles de chauffage.
- **CYCLE DE CHAUFFAGE** : à 27 °C, conduisez le véhicule de 10 à 15 minutes entre 50 et 65 km/h (deux roues motrices), couvercle posé. Si la courroie a été posée à une température de 16 °C ou moins, conduisez le véhicule pendant 20 minutes. Évitez les accélérations brusques et les côtes. Le mieux est de conduire sur terrain plat.
- Patientez jusqu'à ce que la température de la courroie s'abaisse à la température normale de service, puis coupez le moteur et laissez-le refroidir pendant 30 minutes.
- Répétez le **CYCLE DE CHAUFFAGE** une seconde fois. Laissez la courroie se refroidir à nouveau pendant 30 minutes et votre courroie sera alors bien rodée.

### POWERLINK® CVT BELTS

Our Powerlink® drive belts have been specially designed for your motorized Continuous Variable Transmission (CVT) applications, including street-legal, step-through scooters, and Go-Karts. Gates Powerlink belts are available in two types: Conventional belt, which offers OE-equivalent performance and exceptional durability, and our Premium belt, designed for reliable durability in your high performance applications.

- Exact speed control.
- Maximum speed adjustment.
- Fast and easy acceleration.
- Smooth scooter operation.
- For applications with 50-150cc range.

### COURROIES CVT POWERLINK<sup>MD</sup>

Nos courroies (CVT) pour transmission à variation continue Powerlink<sup>MD</sup> ont été spécialement conçues pour vos applications de transmission à variation continue motorisée, y compris les scooters de type Vespa et les karts conformes au code de la sécurité routière. Deux types de courroies Gates Powerlink sont offertes : la courroie traditionnelle qui offre un rendement équivalent à celles des courroies d'origine et une robustesse exceptionnelle, et notre courroie haut de gamme conçue pour une robustesse fiable pour vos applications hautes performances.

- Contrôle précis de la vitesse.
- Réglage à la vitesse maximale.
- Accélération rapides et faciles.
- Fonctionnement souple du scooter.
- Pour les applications comprises entre 50 et 150 cm<sup>3</sup>.

### **BARRICADE® MARINE HOSE**

When you need aftermarket marine fuel lines that outperform OE parts, you need Barricade®. Gates Barricade Marine Fuel Line Hose is U.S. Coast Guard class A1-15 Type R1 approved, CARB & EPA compliant, and is compatible for multi-fuel & bio-fuel applications.

- Nitrile tube with thermoplastic barrier and modified nitrile cover.
- Synthetic fiber reinforcement.
- Meets SAE J1527 standards.
- Working Pressure: 35 psi.
- High temperature range tolerance: -4°F to +212°F (-20°C to +100°C).

### **BOYAU BARRICADE<sup>MD</sup> POUR APPLICATIONS NAUTIQUES**

Lorsque vous avez besoin de conduits de carburant du marché secondaire pour applications nautiques qui surpassent les pièces d'origine, c'est Barricade<sup>MD</sup> qu'il vous faut. Le tuyau souple de carburant pour applications nautiques Gates Barricade est homologué A1-15 Type R1 par la Garde côtière des É.-U., conforme CARB et EPA et compatible pour les applications polycarburants et biocarburant.

- Tube en nitrile avec gaine thermoplastique et protection en nitrile modifié.
- Renforcé par de la fibre synthétique.
- Répond aux normes SAE J1527.
- Pression de service : 35 psi.
- Tolérance élevée de plage de températures : -4°F à +212°F (-20°C à +100°C).

27372	3/8	9.5

**BARRICADE® FUEL INJECTION HOSE (MPI)**

Barricade® Fuel Injection Hose is a low permeation, multi-fuel compatible hose that virtually eliminates fuel vapor loss thanks to our 5-layer GreenShield® barrier technology. Works with multiple fuels (approved for use with leaded and unleaded petrol, diesel, biodiesel up to B-100, E-10, E-15, E-85, 100% methanol, ethanol and gasohol fuels).

- Fuel savings from Barricade's incredibly low permeation rate - the lowest on the market at 1g/m<sup>2</sup>/day.
- Easily complies with environmental standards, exceeds the requirements of SAW J30R14T2 (except for kink resistance).
- Working Pressure: 225 psi.
- Temperature Range: -40°F to +275°F (-40°C to +135°C) continuous, up to +302°F (+150°C) intermittent.

**Note:** Do not submerge in gasoline.

**BOYAU BARRICADE<sup>MD</sup> POUR SYSTÈME D'INJECTION**

Le tuyau souple d'alimentation pour système d'injection Barricade<sup>MD</sup> est un tuyau à faible perméation et compatible pour les applications polycarburants qui élimine pratiquement toutes les pertes de vapeur de carburant grâce à notre technologie de gaine à cinq couches GreenShield®. Compatible avec plusieurs carburants (homologué pour une utilisation avec l'essence avec ou sans plomb, le diesel, le biodiesel jusqu'au B-100, E-10, E-15, E-85, le méthanol à 100 %, l'éthanol et l'essence-alcool.

- Économies de carburants grâce à la perméation incroyablement faible de Barricade, la plus faible sur le marché à 1 g/m<sup>2</sup>/jour.
- Facilement conforme aux normes environnementales, surpasse les exigences de la norme SAW J30R14T2 (sauf pour la résistance au pliage).
- Pression de service : 225 psi.
- Plage de températures : -40°F à +275°F (-40°C à +135°C) constant, jusqu'à +302°F (+150°C) intermittent.

**Remarque :** ne pas plonger dans de l'essence.

**BARRICADE® CARBURETION HOSE**

Advanced fuel formulations require a fuel hose that's up to the task. Barricade® Carburetion Hose provides a premium, low-permeation hose solution compatible for use with many fuel systems and fuel types. Barricade Carburetion Hoses are made with Gates patented five-layer Greenshield® technology, providing exceptional performance and fuel efficiency. This environmentally-friendly hose solution provides five times less permeation than the nearest competitor.

- HNBR tube with thermoplastic barrier and CPE cover; reinforced aramid fiber.
- Meets SAE 30R14 T1, CARB & EPA non-road fuel lines.
- Multi-fuel compatibility.
- Oil, heat, ozone, and abrasion-resistant cover.
- Not for use on pressure lines of fuel injection or cooling system applications.
- High temperature range tolerance: -40°F to +257°F (-40°C to +125°C).

**Note:** Do not submerge in gasoline.

**Caution:** Do not use on pressure lines on fuel injection systems or cooling system applications. Use Barricade Fuel Injection hose for Multi-Port Injection systems.

**BOYAU BARRICADE<sup>MD</sup> POUR APPLICATIONS AVEC CARBURATEUR**

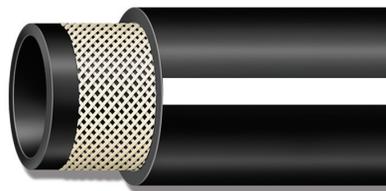

Les formules de carburant de pointe nécessitent un tuyau souple de carburant adapté. Le boyau Barricade<sup>MD</sup> pour applications avec carburateur fournit une solution de tuyau souple haut de gamme à faible perméation pour utilisation avec de nombreux circuits d'alimentation et types de carburant. Les boyaux Barricade pour applications avec carburateur font appel à la Gates technologie brevetée à cinq couches Greenshield<sup>MD</sup>, fournissant ainsi des performances et un rendement énergétique exceptionnels. Cette solution de tuyau souple est écologique et fournit cinq fois moins de perméation que son concurrent le plus proche.

- Tube HNBR avec gaine thermoplastique et protection en CPE; renforcé par de la fibre aramide.
- Répond aux normes SAE 30R14 T1, CARB et EPA pour les tuyaux de carburant non routiers.
- Compatibilité avec de multiples carburants.
- Protection résistante à l'huile, la chaleur, l'ozone et l'abrasion.
- Non conçu pour être utilisé sur les conduits sous pression des applications pour système d'injection ou de refroidissement.
- Tolérance élevée de plage de températures : -40°F à +257°F (-40°C à +125°C).

**Remarque :** ne pas plonger dans de l'essence.

**Mise en garde :** ne pas utiliser sur les conduits sous pression des applications pour système d'injection ou de refroidissement. Pour les systèmes d'injection multipoints, utiliser un boyau Barricade pur système d'injection.

### SAFETY STRIPE® HEATER HOSE

Get more out of your heater hose with a Safety Stripe® Heater Hose constructed for extra-long service life. Intended for use on cars and light trucks, this EPDM hose is unaffected by most coolants, non-oil based coolant additives, and high cooling system pressures. Additionally, it is resistant to high temperatures for extended periods of time, which aids in prolonging its service life, resulting in a more efficient engine.

- Unaffected by most coolants and non-oil based coolant additives.
- Unaffected by high cooling system pressures.
- Good resistance to high temperatures for extended periods of time.
- Not recommended for heavy-duty trucks, buses, or off-road construction equipment; use Green Stripe® heater hose for these applications.
- Meets SAE 20R3 Standard Wall Class D-2 requirements.
- Temperature Range: -40°F to +257°F (-40°C to +125°C).

**Caution:** Do not use for fuel or oil transfer applications.

### BBOYAU DE RADIATEUR DE CHAUFFAGE SAFETY STRIPE<sup>MD</sup>

Grâce au boyau de radiateur de chauffage Safety Stripe<sup>MD</sup> conçu pour durer vraiment longtemps, tirez le meilleur parti de votre tuyau souple de radiateur. Destiné à être utilisé sur les voitures et les véhicules utilitaires légers, ce tuyau souple en EPDM n'est pas affecté par la plupart des additifs pour liquide de refroidissement et les pressions élevées des systèmes de refroidissement. En outre, il est résistant aux températures élevées pendant de longues périodes, ce qui prolonge mieux sa durée de vie, permettant ainsi au moteur d'être plus efficient.

- Non affecté par la plupart des liquides de refroidissement et des additifs pour liquide de refroidissement non à base d'huile.
- Non affecté par les pressions élevées des systèmes de refroidissement.
- Bonne résistance aux températures élevées pendant de longues périodes.
- Non recommandé pour les camions de gros tonnage, les autobus ou les engins de chantier tout-terrain; utilisez un boyau de radiateur de chauffage Green Stripe<sup>MD</sup> pour ces applications.
- Répond aux exigences pour les parois de Classe D-2 de la norme SAE 20R3.
- Plage de températures : -40°F à +257°F (-40°C à +125°C).

**Mise en garde :** ne pas utiliser pour les applications de transfert de carburant ou d'huile.

**POWERGRIP® SB CLAMPS**

Designed for your hose assemblies, Gates PowerGrip® SB Clamps are maintenance-free, durable hose clamps that retain dynamic tension for any shape of hose and housing, even on out-of-round fittings and applications, to reliably stop leaks without the need for re-tightening. The environmentally-friendly PowerGrip SB clamps are designed for a secure, tight fit in extreme operating temperatures to eliminate antifreeze leaks and groundwater contamination.

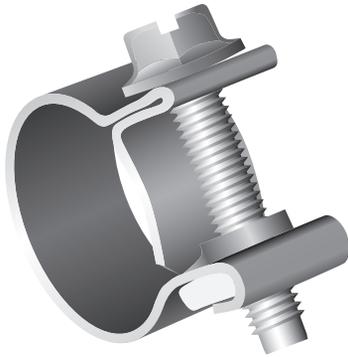

- Easy to install with ordinary heat gun.
- Wider sealing area entraps connector bead.
- Conform to any shape of hose and housing, even out-of-round fittings.
- Heat-sensitive thermoplastic with a memory to prevent over- or under-tightening.
- Can be used with all brands of silicone hose.
- Temperature Range: -40°F to +302°F (-40°C to +150°C).

**COLLIERS POWERGRIP<sup>MD</sup> SB**

Conçus pour vos ensembles raccords-tuyaux flexibles, les colliers Gates PowerGrip<sup>MD</sup> SB sont des colliers de durite robustes et sans entretien qui retiennent les tensions dynamiques pour toute forme de tuyau souple et de boîtier, même pour des raccords ou des applications excentrés, afin d'arrêter les fuites de façon fiable sans devoir resserrer. Les colliers PowerGrip SB sont respectueux de l'environnement et sont conçus pour un serrage solide à des températures de service extrêmes, afin d'éliminer les fuites d'antigel et la contamination des nappes d'eau souterraines.

- Faciles à poser à l'aide d'un pistolet thermique ordinaire.
- La surface d'étanchéité plus large emprisonne le cordon de soudure du raccord.
- Se conforment à toute forme de tuyau souple et de boîtier, même les raccords excentrés.
- Thermoplastique thermosensible pour empêcher de serrer trop ou insuffisamment.
- Peuvent être utilisés avec toutes les marques de tuyaux en silicone.
- Plage de températures : -40°F à +302°F (-40°C à +150°C).

### FUEL INJECTION HOSE CLAMPS

Fuel injection clamps are designed to provide the uniform sealing pressure required of fuel injection hoses. Clamps feature a solid band with rolled edges and a special nut and bolt design.

- Slotted hex shaped 7mm screw and a 9mm band width, with clear zinc-plated carbon steel.

### COLLIERS POUR BOYAUX D'INJECTION DE CARBURANT

Ces colliers pour boyaux d'injection de carburant sont conçus pour fournir la pression d'étanchéité uniforme nécessaire pour les tuyaux souples d'injection de carburant. Les colliers présentent une bande en métal massif avec des bords laminés et un écrou et un boulon de conception spéciale.

- Vis à créneaux de 7 mm et bande de 9 mm de largeur en acier au carbone zingué transparent.

Part No. N° de pièce	Size Taille	Fits Hose I.D. (in.) Compatible avec les boyaux de diam. int. (po)	Fits Hose I.D. (mm) Compatible avec les boyaux de diam. int. (mm)

32285	15	5/16	7.9
32286	16	3/8	9.5

### SUPER HEX/MINEX CLAMPS

Top quality clamp with extra-strength construction. Super Hex features a 1/2" wide band, while the Minex band is 5/16".

- Durable 200 series stainless steel band and screw housing.
- One-piece screw housing is interlocked onto band for extra strength.
- Solid head forged from one piece of steel, cadmium plated.
- Hex-shaped screw has a deep slot that tightens with screwdriver, nut driver, or socket wrench.
- Meets SAE J1508.
- Tighten to 30 in. lb.

### COLLIERS SUPER HEX/MINEX

Collier de qualité supérieure à structure ultra robuste. Super Hex présente une bande de 1/2 po de largeur, la bande Minex ayant 5/16 po de largeur.

- Bande et logement de vis en acier inoxydable robuste de série 200.
- Le logement de vis monobloc est interverrouillé avec la bande pour une résistance supplémentaire.
- Tête monobloc forgée en acier massif cadmié.
- La vis de forme hexagonale a une fente profonde pour se serrer à l'aide d'un tournevis, d'un tournevis à douille ou d'une clé à douille.
- Répond à la norme SAE J1508.
- Se serre jusqu'à 30 po-lb.

NOTES

# NE LA CASSEZ PAS. RODEZ-LA.

POUR BIEN MORDRE LE TERRAIN SANS CASSER  
VOTRE COURROIE, DONNEZ VIE À UNE NOUVELLE  
COURROIE EN TROIS ÉTAPES.

**Pour un rendement optimal et une longue durée de vie, suivez ces trois étapes lorsque vous posez une nouvelle courroie.**

**1 POSEZ LA BONNE COURROIE**

L'utilisation d'une courroie différant même très peu des spécifications du FEO peut affecter son rendement, ou vous faire tomber en panne dans votre lancée.

**2 ALIGNEZ ET NETTOYEZ**

Alignez les embrayages en respectant les spécifications du fabricant et nettoyez les gorges de poulie à l'aide d'un tampon Scotch-Brite<sup>MD</sup>. Retirez les résidus, les dépôts, les huiles et les débris de l'ancienne courroie à l'aide d'alcool ou d'acétone. **NE PAS UTILISER DE PRODUITS NETTOYANTS POUR FREINS.**

**3 POSEZ ET RODEZ**

Effectuez deux cycles de chauffage (de 10 à 15 minutes chacun) à 27 °C et entre 50 et 65 km/h (deux roues motrices), couvercle posé. Patientez jusqu'à ce que la température de la courroie s'abaisse à la température normale de service, puis coupez le moteur et laissez-le refroidir pendant 30 minutes. Répétez le processus une seconde fois. Si la pose de la courroie s'effectue à une température de 16 °C ou moins, effectuez deux cycles de chauffage en 20 minutes et entre 50 et 65 km/h (deux roues motrices). Patientez jusqu'à ce que la température de la courroie s'abaisse à la température normale de service, puis coupez le moteur et laissez-le refroidir pendant 30 minutes. Répétez le processus une seconde fois.

**RÉVOLUTIONNEZ VOTRE CONDUITE EN VOUS RENDANT SUR LE SITE [GATES.COM/GFORCE](https://www.gates.com/gforce)**

**DRIVEN BY POSSIBILITY™**
