

Gates Industrial Corporation plc
Conflict Minerals Report
For the Reporting Period from January 1, 2024 to December 31, 2024

*This Conflict Minerals Report (this “**Report**”) contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the “**Exchange Act**”), that reflect management’s current views with respect to future events, including evaluation of the due diligence process and risk mitigation steps. Such forward-looking statements are subject to various risks and uncertainties. Accordingly, there can be no assurance these future events will occur as anticipated. Investors are urged to consider carefully the disclosure in our filings with the Securities and Exchange Commission (the “**SEC**”), which are accessible on the SEC’s website at www.sec.gov.*

I. Introduction and Summary

This Report is presented by Gates Industrial Corporation plc (collectively with its consolidated subsidiaries, the “**Company**”) to comply with Rule 13p-1 under the Exchange Act (the “**Rule**”) for the reporting period January 1, 2024, to December 31, 2024 (the “**Reporting Period**”).

The SEC adopted the Rule to implement reporting and disclosure requirements related to conflict minerals as directed by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. The Rule imposes certain obligations on SEC registrants whose manufactured products contain conflict minerals that are necessary to the functionality or production of their products. Conflict Minerals are defined as cassiterite, columbite-tantalite (coltan), gold, wolframite, or their derivatives, which are limited to tin, tantalum, and tungsten (collectively, “**3TG**”).

The design of the Company’s due diligence and related results are described below. A copy of this Report for the Reporting Period is publicly available on the Company’s website at <https://www.gates.com/us/en/about-us/policies>. The contents of the Company’s website referred to in this Report are not incorporated by reference into this Report.

I. Company Overview

The Company manufactures a wide range of power transmission and fluid power products and components for a large variety of industrial and automotive applications, both in the aftermarket and original equipment manufacturer (“**OEM**”) channels, throughout the world. The Company’s power transmission products include synchronous belts, asynchronous belts (V-belt, CVT belt or Micro-V® belt) and related components (sprockets, pulleys, water pumps, tensioners or other accessories). The Company’s fluid power products include hoses, tubing and fittings.

The Company has adopted a Conflict Minerals Policy that governs the supply of 3TG in its supply chain. The Gates Industrial Corporation plc Conflict Minerals Policy is publicly available on the Company’s website at <https://www.gates.com/us/en/about-us/policies>.

III. Reasonable Country of Origin Inquiry and Due Diligence Process

A. Design Framework

For the Reporting Period, the Company conducted a good faith, reasonable country of origin inquiry (“**RCOI**”) of the 3TG minerals that are necessary to the functionality or production of the products that the Company manufactured or contracted with others to manufacture during the Reporting Period. This good faith RCOI was reasonably designed to determine whether any 3TG found in the Company’s products originated in the Democratic Republic of the Congo, or an adjoining country, as defined in Form SD (collectively, the “**Covered Countries**”), and whether any 3TG may be from recycled or scrap sources, in accordance with the Rule and related guidance provided by the SEC.

The Company used the Conflict Minerals Reporting Template (“**CMRT**”) to survey our suppliers and identify smelters and refiners (“**SORs**”) in our supply chain, and the Responsible Minerals Assurance Process (“**RMAP**”) to determine the country of origin and conformance status of minerals.

The Company’s due diligence measures are based on the Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, and related supplements, published by the Organization for Economic Cooperation and Development (“**OECD**”). The Company is a downstream company in the supply chain, and its due diligence practices were tailored accordingly. Pursuant to the OECD guidance, the Company undertook to:

1. establish company management systems;
2. identify and assess risks in the supply chain;
3. design and implement a strategy to respond to identified risks;
4. carry out independent audit and due diligence practices; and

5. report on the results of the Company's supply chain due diligence.

B. Reasonable Country of Origin Inquiry

The Company's global supply chain is complex. The Company has a substantial number of suppliers from which it purchases raw materials, components, and products. Our supply chain is multi-tiered and the Company is many levels removed from the mines, smelters, and refiners. The Company does not make purchases of 3TG directly from mines, smelters, or refiners. As a result, the Company necessarily relies upon its direct suppliers to provide information on the origin of the 3TG contained in products, components, and materials supplied to the Company, including sources of 3TG that are supplied to the direct suppliers from lower tier suppliers. The Company works with its direct suppliers to identify, where possible, the SORs and countries of origin of the 3TG.

During the Reporting Period, the Company identified direct suppliers it believed could potentially provide materials, components or products containing 3TG to the Company. We surveyed 490 of these suppliers ("**Surveyed Suppliers**") as to whether the materials, components, or products supplied to the Company contained any 3TG minerals. Twenty-nine of these Suppliers responded in the affirmative ("**Relevant Suppliers**") and were then asked to use the Responsible Minerals Initiative's ("**RMI**") Smelter and Refiner List to identify their 3TG SORs and associated countries of origin.

The Company initiated their annual supplier survey in January 2025 using the most recent RMI template available at the time, CMRT v6.4, released April 26, 2024. The Company compared the list of SORs reported by Relevant Supplier to the RMI Smelter and Refiner List as of the date the survey was initiated to determine potential 3TG SORs and associated countries of origin.

For the Reporting Period, the Company obtained representations from 100% of the Relevant Suppliers. Relevant Suppliers identified a total of 534 individual SORs. The SOR information obtained from Relevant Suppliers related to all customers of these suppliers, not specifically to products or components supplied to the Company. This process revealed the presence of 3TG in some materials, components, or products purchased by the Company, from a small percentage (6%) of suppliers. See Annex A to this Report for a summary of SORs in the RMI Smelter and Refiner List identified by Relevant Suppliers and included in the Company's CMRT.

Despite its due diligence efforts, the Company does not have sufficient information with respect to the Reporting Period to determine the country of origin of all of the 3TG that may be contained in its products. The Company is also unable to determine the particular facilities used to process 3TG in the Company's products. As mentioned above, SOR information was obtained from all Relevant Suppliers at the company level, not at a product level, and as a result, we cannot determine which of the identified SORs are actually in the Company's supply chain.

Where needed, we contacted suppliers to address various issues, including incomplete data and sourcing locations without complete supporting information from the supply chain, or an indication that the SOR was sourced from a Covered Country. All SORs identified by the Company's suppliers for the period covered by this Report were found in the RMI Smelter and Refiner List of verified SORs as of the date the supplier survey was initiated¹. The Company has no reason to believe or evidence to suggest that any of the 3TG contained in its products finances armed conflict in the Democratic Republic of Congo region.

C. Due Diligence Measures

The Company has undertaken the following due diligence measures:

a) Establishment of company management systems

The Company has taken steps to develop a strong company management system pertaining to the use of 3TG in its products and supply chain. These steps include:

- Establishment of a Conflict Minerals Policy (publicly available at: <https://www.gates.com/us/en/about-us/policies>);
- Maintenance of an internal, cross-functional team to support supply chain due diligence; and
- Implementation of internal processes for surveying Relevant Suppliers (including follow-up procedures), managing supplier responses, identifying SORs in the supply chain, and assembling the Company's own CMRT for its customers.

b) Identification and Assessment of Risks in the Supply Chain

As a downstream user of products, components, and materials containing 3TG, the Company is multiple levels removed from the mines from which such 3TG originated, and the SORs who processed those minerals. The Company continues to assess its supply chain risks and work with its suppliers to develop greater supply chain transparency. As discussed above, each year, the Company solicits Relevant Suppliers using due diligence tools such as a supplier survey and the RMI Smelter and Refiner List. Additional due diligence steps utilized to help identify and assess risks in the supply chain include:

- Conducting an informed internal analysis with a cross-functional team regarding the types of products, components, and materials supplied to the Company, in order to identify the Relevant Suppliers that may supply products, components, and materials containing 3TG to the Company;

¹ Verified SORs are those listed in the RMI Smelter and Refiner List or the U.S. Department of Commerce as known metal processors as of the date the supplier survey was initiated

- Implementing internal measures to strengthen Company engagement with Relevant Suppliers; and
- Implementing follow-up procedures and additional solicitation requests for suppliers that did not respond or that failed to provide sufficient information.

The Company verified the information provided by Relevant Suppliers (to the extent reasonably possible) by comparing it to information contained on the RMI website and in RMI's CMRT forms.

c) Design and Implementation of a Strategy to Respond to Identified Risks

To respond to identified risks, the Company has developed due diligence procedures and a Conflict Minerals Policy, as referenced herein. The Company also requires its suppliers to perform due diligence into their respective supply chains to determine whether products sold to the Company contain 3TG, and whether such minerals are sourced from conflict-free SORs. This requirement is set forth in, among other things, the Gates Supplier Code of Conduct. The Company also uses a cross-functional team to conduct its due diligence process, which includes occasional reporting of the progress and reporting of any concerns to senior management in the global sourcing division.

The Company intends to continue to evaluate its due diligence program in accordance with the provisions of the Rule. This includes annual solicitation of suppliers and periodic review of the criteria used to select suppliers for solicitation. The Company will continue to engage with its suppliers to identify the 3TG used within its supply chain, as well as the origin and chain of custody of the 3TG and will continue to work to maintain the response rate for the RCOI process and the Company's visibility into the relevant country of origin information. To the extent any supplier is found to be using non-conformant SORs within its supply chain, the Company intends to engage with that supplier and re-communicate our requirement for suppliers to commit to be conflict-free.

d) Carrying Out of Independent Audit and Due Diligence Practices

Where possible, the Company has relied on third-party assurances and certifications. For example, the Company accepted as reliable any SOR that is part of RMI's verified list. To the extent other audited supplier certifications are provided to the Company, the Company would consider reliance on a case-by-case basis.

e) Reporting of the Results of the Company's Supply Chain Due Diligence

The Company publicly communicates its Conflict Minerals Policy, its CMRT, and this Conflict Minerals Report on its website.

D. Future Risk Mitigation Efforts

The Company intends to continue to evaluate its due diligence program in accordance with the provisions of the Rule. This includes conducting additional inquiries to improve transparency, following-up on incomplete responses or no responses from the Company's supply chain, and evaluating and managing any related risks. The Company is also a member of the RMI, providing it with greater access to relevant RCOI and SOR information.
